Run the AutoCAD KeyGen.exe file, and follow the instructions. The keygen generates a keys file (.akey), and then creates and saves a folder containing a *.pref file for each user on the machine. Open that folder to view the *.pref files for your user and copy the one that you prefer. Open the preload.cfg in the current directory. You can download the pref file and import it into the current directory to enable the AutoCAD KeyGen to work on new machines. Open the pref file in the current directory and copy the token string found in the Options Section (section '4' on the sample pref file. Open the Preload.cfg file and paste the token string in the Options section (section '4' on the sample Preload.cfg file). Save the pref and preload files. Example of Preload.cfg file: "1" token="Autocad" "2" token="Autodesk" "3" token="Autodesk Autocad" "4" token="Custom" "5" token="Cryptic" "6" token="FMP" Example of Preload.cfg file token string: "token=Autocad\ token=Autodesk\ token=Autodesk Autocad" Open the ad_preload.cfg in the current directory and paste the token string found in the Options Section (section '4' on the sample ad_preload.cfg file.
